500 Metal Vessels: Contemporary Explorations of Containment (500 Series)

Marthe Le Van : 500 Metal Vessels: Contemporary Explorations of Containment (500 Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised 500 Metal Vessels: Contemporary Explorations of Containment (500 Series):

0 of 0 people found the following review helpful. but the ideas in this book are so wonderful, it gave me ideas on how I can ...By LJM from BostonThis book is gorgeous! I work in pottery, but the ideas in this book are so wonderful, it gave me ideas on how I can modify some of these ideas into clay. I borrowed it from the library to see what was inside, and after I paged through it several times and made a whole bunch of sketches in my ceramics journal, I decided I needed to add it to my library so purchased it. Such creative and inspiring artwork! Wonderful addition to ANY art library.0 of 0 people found the following review helpful. Beginning MetalsmithBy AnneCakesFantastic idea book! Beautiful examples of hollow ware craftsmanship.0 of 0 people found the following review helpful. Five StarsBy T. M. P.Great book! I love it.

Juried by Fred Fenster, a distinguished presence in the field, 500 Metal Vessels features page after page of superbly crafted bowls, teapots, vases, chalices, urns, and other exquisite handmade hollowware. Made from diverse metals and techniques (forging, raising, casting, forming, soldering, and welding), these eye-catching pieces also display gorgeous

applied surface embellishments, from enamel to repouss. Explore Sarah Perkins luminous enamel bowls; the monumental vessels, made by Kim Cridler out of unassuming steel rods; and the work of Tom Ferrero, whose fascination with architecture and Gothic forms inspired his meticulous surface designs.
