John Tow Shanton : A Matter of Time: The Wonderful World of Wristwatches before purchasing it in order to gage whether or not it would be worth my time, and all praised A Matter of Time: The Wonderful World of Wristwatches:

As long as he can remember, the author has been fascinated by wristwatches. His love for fine things mechanical was

what got him so involved with their inner wonderworks. He believes that it was his having become so wound up within their gear trains that he ticks the consistent way he does today! It is no secret that the complex clockwork of his mind runs counter to the thinking that the days of wristwatch - as we know it, are numbered. His interest in wristwatches can be seen here in this photo. In this quick-read book, one of the six he has written, he wishes to share with you, the reader, yet another of the many joys in his life.
