Ancient Glass Research Along The Silk Road

Gan Fuxi : Ancient Glass Research Along The Silk Road before purchasing it in order to gage whether or not it would be worth my time, and all praised Ancient Glass Research Along The Silk Road:

The Silk Road is a main artery connecting Europe and Asia for political, economical, cultural and technical exchange in antiquity, and glass is one of the earliest artificial materials to be invented. Studying the origin and evolution of

ancient glass along the Silk Road is thus significant for understanding the development and exchange of culture and technology between China and abroad. This book, for the first time, traces the origin, evolution and spreading of ancient Chinese glass technology. It collects a wealth of data contributed by Chinese and foreign experts regarding the history and background, visual characteristics and chemical compositions of the unearthed ancient glasses from along the Northern (Oasis) Silk Road, especially from the Xinjiang Province (known as the Western Region in ancient times). The book presents new results of the studies on ancient glasses along the Southern and Sea Silk Roads, and discusses the influence of the Silk Road on ancient Chinese glass technology and art.
