Conservation of Leather and Related Materials

Roy Thomson (Editor) Marion Kite (Editor) : Conservation of Leather and Related Materials before purchasing it in order to gage whether or not it would be worth my time, and all praised Conservation of Leather and Related Materials:

9 of 12 people found the following review helpful. Not as advertisedBy Earl shows this ~\$90 book as bound and printed in Italy (go to "Inside Cover" and check copyright page IV). In reality, it is bound and printed in China. This has happened to me before. The previous book's binding broke when first opened. This one is not much better.Amazingly, when emailed, replied that nothing on their website showed where the book was printed and bound! doesn't know what's on a copyright page? Wow.So just be careful buying expensive reference books over the internet. In stores you can check.
