Corning Pyroceram*^r Cookware

Debbie Coe : Corning Pyroceram*^r Cookware before purchasing it in order to gage whether or not it would be worth my time, and all praised Corning Pyroceram*^r Cookware:

4 of 4 people found the following review helpful. Just What I Needed To Identify My CollectionBy aastahrI just received this book and read the whole thing in one sitting. It is just what I was looking for - clear pictures, product numbers and measurements in inches including the bottoms and the tops. I cannot say enough about this book. If you are just starting to collect and want to learn the history and dates of various patterns, this is the book for you.1 of 1 people found the following review helpful. Great assortment of patternsBy bpearsonGreat assortment of patterns. As a reference suffers from no lists of product line production items, i.e., no list of sizes and shapes manufactured for each pattern.4 of 4 people found the following review helpful. Corning Pyroceram CookwareBy Laura HornThis is a good source of CorningWare information...one of two books that I know about. Interesting and well illustrated with nice photographs. The only thing that keeps it from being a five star is some frustration with contradicting info and no way of knowing which is correct.

The first reference book to provide a detailed account of the Pyroceram® cookware, developed at Corning by Donald Stookey and marketed in 1958. This special Pyroceram® material was first used on military missile nose cones, and because of its durability, it was felt to be a great medium for the kitchen, too. Easily taken from the freezer, used in the oven, microwave, or on the range, it was beautiful enough to be served at the table. After a meal, it went straight to the dishwasher. The cookware saved many steps for the consumer. 60 plus patterns are listed and shown in over 400 color photos. Reprints of catalogs, brochures, and historical material, and a detailed bibliography provide much additional information. All information was carefully compiled from original catalogs and reprints, company brochures, trade journals, company advertising, auction lists, eBay, and the shared extensive experience of many dedicated dealers and collectors. An index gives easy access to material.

About the Author Debbie and Randy Coe are enthusiastic dealers in popular vintage ceramics and American glass. They have written several books on glass and antiques for Schiffer Publishing, and live near Portland, Oregon.
