You can use it in weaving functional fabrics for clothing (loom-shaped or tailored), window fashions, sun-screens, table linens, or room dividers even on a table loom. The design possibilities for nonfunctional uses of the technique are limited only by the creative imagination of the weaver. In this monograph the author first explains the technique with extensive use of diagrams and pictures and then presents 9 drafts using these techniques (9 for 4-harness, 2 for 6-harness and 2 for 8-harness) including tie-ups and a photograph of the finished fabric." contents preface acknowledgments the elements of doup leno definitions introduction doup warp weft yarns sample project: threading the loom, jumpers, treadling variations, check points drafts for 4-harness looms drafts for multiple harness looms weaving doup leno on a counter balance
