Peter Card : Early Cycle Lighting 1868-1948: Identification and Value Guide (Crowood Collectors' Series)
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Early Cycle Lighting
1868-1948: Identification and Value Guide (Crowood Collectors' Series):

Written by a seasoned collector of transport memorabilia, this book chronicles the origin and evolution of cycle lamps.

During the nineteenth century, keen cyclists realized how essential they were to cycle in the dark - both to light the way ahead and alert other road users. Manufacturers were quick to respond to demand, and soon a wide range of simple lamps was available, usually fuelled by oil. This study follows their development as they quickly grew in sophistication, their makers trying to out-do one another in style and efficiency.

About the Author Peter Card runs an auction business specializing in transport memorabilia. He has been collecting early cycle lamps and accessories for many years. He is a member of the Advisory Council of the National Motor Museum. He lives in Somerset.
