The electrification of the watch led to massive upheaval in the watch industry as mechanical chronometers built by Old World masters developed into electromechanical devices mass produced in Asia. In nearly 600 images and in-depth text, this book retraces the often circuitous paths that led from the electromagnetic pendulum clock to the modern quartz wristwatch.

About the Author Lucien F. Trueb, Gunther Ramm, and Peter Wenzig all have extensive experience in science and technology, as well as a passion for timepieces. Trueb lives in Switzerland; Ramm and Wenzig live in Germany.
