Spectacular cars and stories!By Holland W WallaceDennis Adler is one of the great automotive photographers, and writes text to match. Put him together with the incredible collection lovingly assembled by B J Nethercutt and the results are one of the great car books. This is basically a coffee-table book, but it's a terrific gift for any car lover. (If you're a car lover and don't have anyone to give you a copy, buy it for yourself. You won't be sorry!)0 of 0 people found the following review helpful. The book was great as advertisedBy TailfinnThe book was great as advertised. It has beautiful pictures and the history of Jack`s collection of automobiles. The book looked new. A great book for my library.

The Cars of San Sylmar by Dennis Adler, is the official publication of the famous Nethercutt car collection, a museum located in San Sylmar, CA. Having collected major automotive marques since WWII, Mr. J.P. Nethercutt has amassed one of the world's most important automobile collections. Dennis Adler, an award winning automotive photographer journalist with over 5,000 articles to his credit, was chosen by the museum to be the writer and photographer for this unique publication. A stunning visual masterpiece with many 2-page color spreads, no expense was spared to make this new 9x12 inch landscape book an extraordinary literary achievement. Not only are most of the more famous and well-known cars pictured and described, but all the cars are listed in a photo index. Additionally, there is a chapter on mechanical musical instruments, since the Nethercutt Museum also contains one of the world's best collections of these rare and unusual artifacts.
